

COMPRESSANA SOCKS & STOCKINGS

For healthy &
beautiful legs

FINE SUPPORT STOCKINGS

For vitality and beauty

To stand on healthy legs and look attractive – there is no woman who does not desire that! Our modern and premium-quality full-fashioned CALYPSO hosiery is the result of an intensive product development and long lasting experience.

Let your leg be gently and tenderly pampered with micro soft compositions, shiny transparency and optimal fit. Feel the agreeable and stimulating effect of the COMPRESSANA CALYPSO stockings already during donning. The feeling of vitality and energy accompanies you around the clock and allows you to go unburdened through life.

At every step the appropriate hosiery

Select from soft to strong support and shiny to opaque appearance.

Your value guarantee

Our quality standard "long-life" guarantees that only the finest yarns with high quality of our own development or production are used. The careful and complex production process ensures high quality stockings with pleasant wearing comfort and beautiful mesh surface.

www.compressana.de

The correct pressure makes the difference

The effect of COMPRESSANA CALYPSO is based on the anatomically correct pressure profile along the leg. The gentle pressure (measured in mmHg) supports the veins conveying the blood pour in oxygen back to the heart and relieves the legs. The results are visibly more beautiful legs and the good feeling to do something for your health.

100%

COMPRESSANA *CALYPSO 140*

Figure-shaping tights and stockings with strong support effect assist the function of the veins. COMPRESSANA CALYPSO 140 offers an attractive even and smooth mesh structure as well as the appearance and the satiny gloss of high quality full-fashioned stockings.

- elegant fine mesh structure - almost opaque
- anatomical shape and fit
- reinforced toe and heel
- high durability

PREGNANCY WITH COMPRESSANA

Veins under pressure

The physical stress during pregnancy fosters the occurrence of vein problems. Varicose veins affect about one in three women. For women who have had more than one pregnancy up to six out of ten develop vein problems. A lot of women accept vein problems fatefully, hoping that varicose veins disappear after pregnancy. However that is not the case. Quite often dilated veins persist and the varicoses progress.

The prevention of venous disorders is therefore a "must" for every pregnant woman. The most sensible and effective relief for heavy, tired or achy legs and swellings are COMPRESSANA support stockings or tights. The pressure supports the veins from the outside and improves the blood flow.. The veins can then no longer become flaccid, blood circulation in the legs is improved and even pregnancy symptoms such as nausea, vomiting and dizziness can be relieved.

MEDICAL COMPRESSION STOCKINGS OF COMPRESSANA

If support stockings won't work sufficiently

For serious vein problems and oedema COMPRESSANA offers a considerable range of attractive medical compression stockings – they alleviate your health problems reliably. Your physician, pharmacist or medical consultant will be pleased to advise and inform you about the most suitable stockings.

Reisestrümpfe travel stockings

IDEAL FOR TRAVELLING.

ON THE PLANE, ON THE BUS, BY TRAIN OR BY CAR

Due to the confined space in aeroplanes, buses, trains or cars, your legs often stay motionless and in angled position for hours. The blood is pooling in the legs and the venous blood return is hampered. COMPRESSANA below-knee stockings ideally support the veins in your legs and maintain the blood circulation, especially while travelling.

COMPRESSANA – Your ideal companion throughout the day.

Everybody who would like to be active in life should protect their legs in time from harmful strains. Typical risk factors causing vein problems are:

professions with mainly standing or sitting work postures, strenuous daily routine, pregnancy, overweight, hereditary handicap or the common physical inactivity.

COMPRESSANA hosiery fashion ideally supports your legs and reliably prevents leg illnesses.

Do you sometimes wish to "run away"?

Many people suffer from leg problems and experience an unpleasant emotional roller coaster – especially when the pain in the leg occurs from time to time only and no direct cause can be determined. This happens to men and women equally.

Suddenly the pain is there, with symptoms of heaviness, swellings, fatigue, tiredness, tingling or itching, vanishing without any reason. Often associated with psychosomatic effects, a sense of unattractiveness or low performance are not uncommon.

Wearing support stockings can often relieve the pain.

Characteristics of support stockings

- activation of the leg musculature
- improvement of the vein activity
- support and massage of the connective tissue
- can counteract swellings
- prophylaxis against vein illnesses and varicosis
- keeps legs fit and prevents tired legs
- smoothes the skin and covers skin flaws
- forms the legs and gives them a more beautiful look

Power socks or Sport knee socks

Power Socks or Sport knee socks
Energy booster for athletes and fans
of leisure activities: Increased blood
circulation, oxygenation and muscle
activation brings about higher per-
formance, endurance and quickens
recovery time.

Knee Sport support stockings
with decreasing pressure gradient
towards the heart are recommended
for both healthy legs and in case of
venous disorders.

**MORE PERFORMANCE IN SPORTS.
YOUR ENERGY BOOSTER.**

Legal drugs for your legs for leisure time, sports and job

Active in the job

Employees sitting or standing
regularly often suffer from tired,
aching legs after a long working
day. COMPRESSANA support
stockings prevent these and
other troubles effectively – on
vitalised legs you will be able to
practise your job in future for a
long time.

**PERCEPTIBLE SUPPORT
THE WHOLE DAY LONG.**

SUPPORT KNEE STOCKINGS WITH FUNCTION IDEAL FOR EVERYDAY LIFE AND FOR TRAVELLING

Yarns of the newest generation combine function with invisible support effect. At the same time the stockings gain highest wearing comfort by the combination of natural and high-tech fibres.

Innovative natural – natural innovative

Therapeutically effective silver fibres, moisture and climate-regulating Coolmax, or cuddly Microcotton are three examples from a wide range of high-tech fibres. In combination with natural fibres, e.g. skin-friendly Cotton or warming Wool, these offer an incomparable wearing comfort and superior wearing features.

Support your legs

Wearing comfort and the characteristics of the TWIST product series correspond to the needs of modern, open-minded people – the look in accordance to the current fashion. The products can be combined very well with modern, smartcasual and comfortable clothes in spare-time, sport and job. Of course these products are unisex – i.e. they can be equally worn by ladies and gentlemen.

Legwear for legcare

The combination of support effect and function enables even more. Besides stockings, which serve for the prevention of vein illnesses, we offer with Compressana Sport and Aktiv completely new special socks and stockings for sport, job and spare time. They stabilize and relieve the joints or activate the muscles and blood circulation and possibly can even reduce the risk of injuries.

PRONATION CONTROL SOCKS

Relieving and performance-preserving compression socks with integrated tapes for endurance sports in case of overpronation (Pes valgus)

Non-adhesive taping bands, which are welded onto the socks, stimulate the muscles and stabilise the foot three-dimensionally in the longitudinal and transverse arches, so that forces occurring under high load are better absorbed and dissipated. In various sports, foot correction using tapes plus compression can also lead to a reduction in discomfort in the shoe or boot.

TAPE CORRECTION SOX

TABI SOCKS WITH TAPES INSIDE

TAPE CORRECTION LOOPS

NON-ADHESIVE SKIN-FRIENDLY TAPE LOOPS

Malpositioning

valgus

Advanced malposi-
tioning of the big toe
combined with Pes
valgus

Malposition of the
mid-foot in cases of
Pes valgus

Malpositioning
of the little toe in
cases of Hammer
toe

TAPE SOX are Japanese tabi socks with separate toe areas or special socks with integrated non-adhesive and skin-friendly tapes.

The skin-friendly TAPE LOOPS are attached to fabric to correct Hallux valgus and Hammer toe. COMPRESSANA TAPE SOX and LOOPS combine the benefits of conservative therapy options such as physiotherapy with kinesiotope to counteract malpositioning of the foot or toes. They are free from side-effects. They can be used long term for problems that have functional causes. These include: bunions, flat feet, splay feet and hammer toes. The preventive, therapeutic and correctional use of tape socks can defend deterioration and subsequent complaints such as foot and joint pain or osteoarthritis in the joint of the big toe.

Preventative: The COMPRESSANA TAPE SOX and LOOPS can be worn as a precautionary measure if you have an existing or developing misalignment.

Post-operatively: After an operation for bunions or hammer toes, taping socks can help maintain a successful operation result by countering local misalignment.

The corrective socks offer relief and support for flat feet and splay feet.

Foot care while you go! Health Socks

Therapeutic comfort for sensitive feet

The GoWell line offers solutions and relief for any type of sore, unhealthy and problematic feet. GoWell high quality health socks are "Made in Germany".

- **Pressure sensitive and pressure vulnerable feet**
- **Feet with deformations and adhesions**
- **Foot extents, e.g. wearer of orthosis**
- **Cold feet**
- **Foot perspiration, foot odour, fungus, bacteria**

GoWell health socks are no conventional socks. Modern fibres, above all the unique X-Static silver fibre, climate-effective 2-layer processing and complex plush-padded-technology result in health products for highest demands.

Silver destroys a wide range of bacteria and fungus and reduces the risk of infections.

COMPRESSANA INTRA

Base layer and fixing system for modular wound and skin treatment

Scope of application:

- Fixation of wound dressings for the treatment of small skin injuries
- Non-slip fixation of truss pads, inlays to protect against pressure and pads for the treatment of medically and anatomically complex situations on the foot, ankle or lower leg
- In combination with flat or round knitted compression stockings, pressure truss pads and wound dressings for the modular ulcer-cruris treatment
- For patients with sensitive skin to put on underneath compression stockings and supports
- Due to high flexibility suitable for wearing in preference to socks/below-knee stockings in cases of tenderness, deformation, adhesion, large leg and foot circumferences etc.
- Toe parts (toe support or toe protection) ideal for the supporting treatment of the gaps between the toes or for the combination with compression or supporting stockings with open toe.
- To protect the foot as well as the leg against abrasion and chafing wearing of COMPRESSANA INTRA underneath of socks/stockings is recommended. As a result effects caused by mechanical influences e.g. blisters and sores can be avoided. In combination with Thermo-support stockings/socks or other woollen products they offer optimal protection against cold as well as protection against possible allergic reactions caused by wool products.

The X-static fibre as well as the Argentex-yarn consists of a layer of pure silver, which is firmly connected with the surface of a textile fibre. The silver is merged on the inner side of the skin-tight knitting and effects the skin directly. Due to the fineness and the special structure of the fibre COMPRESSANA INTRA feels extremely soft, smooth and more importantly extraordinarily skin-friendly.

Silver destroys a wide range of bacteria and fungus and reduces the risk of infections. Silver fibres are used for sensitive, stressed and inflamed skin and also with chronic skin diseases. Silver ions develop when the fibre gets in contact with the skin and react with the protein of the germ and thereby exhibit an antimicrobial effect. Silver reduces the odour formation. Furthermore its outstanding conductivity helps thermo regulation and reduces static.

PRACTICAL ACCESSORIES

For easier application and for assistance of patients in their daily life COMPRESSANA offers specially dedicated accessories.

COMPRESSANA ANTI-ITCHING SPRAY

The active ingredient polidocanol soothes the skin and can prevent itching for several hours. The spray provides moisture and has an antimicrobial effect against excessive bacteria and germ formation. Inflammation caused by scratching is prevented.

It can be used several times a day on affected skin areas or directly on support and compression stockings, is absorbed without residue and does not leave any stains. The spray can be used independently or in addition to the cream or lotion.

Ingredients: Aqua, Butylene Glycol, Laureth-9, Chlorhexidine Digluconate

Product	Art.No
ANTI-ITCHING SPRAY Spray 150 ml	0583
ANTI-ITCHING SPRAY Spray 50 ml	0580

COMPRESSANA SKIN PROTECT

Intensive care and repair creme

Skin regeneration and acute care of stressed, sensitive areas of the skin, even in cases of venous disorders. The antimicrobial effect of silver reduces the risk of infection. The repair complex can counter inflammation, irritation, etc. and promotes skin renewal.

For regular use, especially after wearing support and compression stockings, recommended especially on irritated skin areas. Also suitable for neurodermatitis and diabetics.

Ingredients: Aqua, caprylic/capric Triglyceride, Panthenol, Glycerin, Pentylen Glycol, Polyglyceryl-3 Methylglucose Distearate, Zinc Oxide, Glyceryl Stearate, Stearyl Alcohol, Tocopherol, Silver, Citric Acid

Product	Art.No.

SKIN PROTECT Mini-tube 10 ml	0756

COMPRESSANA TONIC

- Vitalizes + strengthens the veins
- Refreshes + cools the legs
- Nourishes + moisturizes
- Medicinal plant extracts from horse chestnuts, sage, comfrey and witch hazel
- Care complex with evening primrose and apricot kernel oil
- Also recommended for the legs during PREGNANCY

The tonic combines proven venous agents and sustainable care substances to create a unique and well-tolerated composition. In combination with support and compression stockings, blood circulation and microcirculation can be improved. Uncomplicated use! Can also be sprayed directly onto the stockings.

Inhaltsstoffe: Aqua, Alcohol Denat, Glycerin, PEG-40 Hydrogenated Castor Oil, Sodium Lactate, Menthol, Lactic Acid, Hamamelis, Virginiana Leaf Extract, Litsea Cubeba Fruit Oil, Oenothera Biennis Oil, Prunus Armeniaca Kernel Oil, Symphytum Officinale Root Extract, Aesculus Hippocastanum Seed Extract, Camphor, Juniperus Oxycedrus Wood Oil, Linalool, Geraniol

COMPRESSANA DERMA LOTION

Highly intensive emollient and skin protection for varicose veins, lipoedema, lymphatic oedema and skin diseases.

The lotion provides intensive and long lasting moisturisation. Protects the skin, keeps it supple and resistant and prevents irritations and itching. For regular use after wearing support and functional stockings.

Ingredients: Aqua, Isopropyl Palmitate, Caprylic/Capric Triglyceride, Butylene Glycol, Urea, Dilisostearoyl Polyglyceryl-3 Dimer Dilinoleate, Dimethicone and Dimethiconol, Magnesium Sulfate, Hydrogenated Castor Oil, Cera Alba, Phenylpropanol, Tocopherol, Bisabolol, Backhousia Citridora Leaf Extract, Citral

COMPRESSANA HYDRO LOTION

For improved tolerance and better grip of stockings. Also suitable for application in the area of the grip top and silicone adhesive edge, before and after wearing support stockings.

Acute care against itching and for protection against irritations. Calms and soothes sensitive skin from mechanical irritations and rubbing. Enhances the skin regeneration and provides long lasting moisturisation.

Ingredients: Aqua, Caprylic/Capric Triglyceride, Glycerin, Pentylene Glycol, Polyglyceryl-3 Methylglucose Distearate, Laureth-9, Stearyl Alcohol, Glyceryl Stearate, Zinc Oxide, Tocopherol, Citric Acid, Xanthan Gum

COMPRESSANA VLIES

Practical care tissues for skin and band

Compressana VLIES is used to care for areas of skin under compression treatment – even in the area of the band – and to clean the silicone coating if necessary. The fluid contained in the care tissue protects sensitive skin from irritation, soothes itching, moisturises and removes flaky skin. Skin irritations are prevented. It also ensures a better hold and fit of support stockings and prevents slipping. Can be used before, during and after wearing support stockings.

Ingredients: Aqua, Caprylic/Capric Triglyceride, Pentylene Glycol, Laureth-9, PEG-40 Hydrogenated Castor Oil

COMPRESSANA VEIN BALM

The vein balm protects and nourishes the skin and gives a pleasant and fresh feeling before and after wearing support stockings.

Absorbs quickly and without residue. Selected natural ingredients (horse chestnut, arnica fluid extract and essential oils such as eucalyptus, camphor and rosemary) provide additional help and skin care for vein problems.

Ingredients: Aqua, Paraffinum Liquidum, Isopropyl Alcohol, Caprylic/Capric Triglyceride, Glycerin, Urea, Cetearyl Alcohol, Ammonium Acryloyldimethyltaurate/Np Copolymer, Triureth-4 Phosphate, Polyglyceryl-2-Sesquiosterate, Eucalyptus Globulus Oil, Dimethicone, Camphor, Arnica Montana Extract, Aesculus Hippocastanum Seed Extract, Phenoxyethanol, Ethylhexylglycerin.
