FINE SUPPORT STOCKINGS FOR VITALITY AND BEAUTY

To stand on healthy legs and look attractive – there is no woman who does not desire that! Our modern and premium-quality full-fashioned CALYPSO hosiery is the result of an intensive product development and long lasting experience.

Let your leg be gently and tenderly pampered with micro soft compositions, shiny transparency and optimal fit. Feel the agreeable and stimulating effect of the COMPRESSIONAL CALYPSO stockings already during donning. The feeling of vitality and energy accompanies you around the clock and allows you to go unburdened through life.

Your value guarantee

Our quality standard „long-life“ guarantees that only the finest yarns with high quality of our own development or production are used. The careful and complex production process ensures high quality stockings with pleasant wearing comfort and beautiful mesh surface.

The correct pressure makes the difference

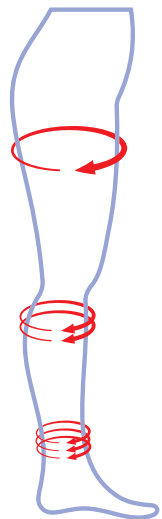

The effect of COMPRESSIONAL CALYPSO is based on the anatomically correct pressure profile along the leg.

The gentle pressure (measured in mmHg) supports the veins returning the blood that is low in oxygen back to the heart and relieves the legs. The result is legs that are visibly more beautiful and the feeling you get knowing that you have done something good for your health.

COMPRESSIONAL CALYPSO

is stocking fashion in three variations. Choose from soft to forte in terms of support and from ultra-soft to almost opaque in terms of appearance.

- perfectly fitting anatomical shape
- elaborate heel and toe sections
- micro-soft and skin-friendly
- high durability thanks to double-wound yarns

COMPRESSANA CALYPSO 140

Figure-shaping tights and stockings with strong support effect assist the function of the veins. CALYPSO 140 offers an attractive even and smooth mesh structure as well as the appearance and the satiny gloss of high quality full-fashioned stockings.

With comfort body part: Asymmetric body part with anatomically optimum fit. Varying mesh-sizes with stretch reserves in the body part for perfect fit in all situations.

- elegant fine mesh structure - almost opaque
- anatomical shape and fit
- reinforced toe and heel
- high durability

Material: 78% Polyamide, 22% Elastane

Support class III strong: approx. 15 – 18 mmHg, 140 den

*For sensitive skin
and feet*

COMPRESSANA TWIST THERMO

Below-knee stockings with wool

- **warming support effect**
- **soft and pleasant**
- **merino wool plus Thermolite**
- **reinforced sole**

A major advantage of wool is its ability to absorb moisture of up to 30% of its own weight without feeling damp. Air contained in the cavities of the fibre forms an insulating layer that, on the one hand, does not allow cold outside temperatures to reach the skin and, on the other hand, stores body heat. When using merino wool with the finest fibre density, the skin nerves are not irritated and therefore this wool is perceived as comfortable by most people. Wool also has antibacterial properties. Even after a strenuous day of wear, a high-quality wool sock still smells pleasant.

COMPRESSANA Thermo is also suitable as an understocking in extreme cold, or due to the natural blister protection of wool, e.g. when hiking or doing sports.

Thermolite: The functional fibre Thermolite is incorporated into the sole of the foot for insulation. Thanks to hollow fibre technology, Thermolite offers cosy warmth at a very low weight. The surface and the texture of Thermolite allow best moisture transport and quick evaporation. Thermolite is ideally complemented by high-quality wool.

Material: 46% Merino wool, 42% Polyamide, 8% Elastane, 4% Thermolite (PES)

Support class III forte: approx. 16 mmHg

Sizes: 36 – 46

Types:

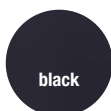

- Below-knee stockings with wool

Types: Below-knee stockings

PER SPECTIVES

for your health

COMPRESSANA LIFESTYLE PIQUÉ

The new compression below knee stockings from the Lifestyle range

Piqué - also known as Marcella - is a double-sided knitted fabric with a relief-like structure: chic and modern thanks to its two-coloured geometric patterns. The characteristic waffle structure of the knitted fabric, which looks like quilting, is created by the interplay of tuck and knit stitches.

The small air-permeable pores and the three-dimensional structure, which keep part of the knitted fabric away from the surface of the skin, ensure optimum air circulation.

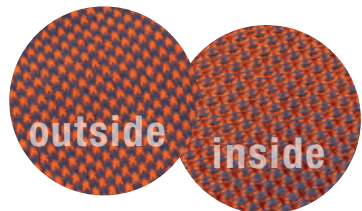

Piqué stockings are highly breathable, comfortable and easy to put on.

COMPRESSANA Lifestyle Piqué below knee stockings are available in two versions:

COMPRESSANA LIFESTYLE PIQUÉ 20

fine waffle look, three-dimensional inside,
smooth outside

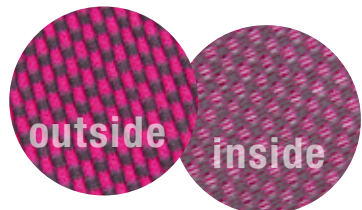

compression support 15-20 mmHg

COMPRESSANA LIFESTYLE PIQUÉ 30

large waffle look, smooth inside,
relief textured outside

compression support 20-30 mmHg

MODERN LOOK FOR NEW PERSPECTIVES AND NUMEROUS BENEFITS:

Breathability: The special piqué structure ensures optimum air circulation, keeping feet fresh and dry all day long

Comfort: Thanks to the soft materials and perfect fit, these knee-high socks are extremely comfortable to wear, whether in the office or at leisure

Stylish Design: The attractive piqué surface gives a touch of style to any outfit

Durability: Robust, high-quality materials guarantee long life

COMPRESSANA LIFESTYLE PIQUÉ 20

Below-knee stockings – three-dimensional inside, smooth outside.

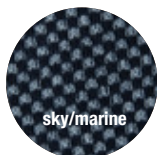

- cool and elegant two-colour designs
- graduated compression
- climate & moisture regulating
- breathable thanks to air-permeable pores

Compression support: 180 den

Sizes: S – XXL

COMPRESSANA TAPE SOX AND LOOPS

TAPE SOX are Japanese tabi socks with separate toe areas or special socks with integrated non-adhesive and skin-friendly tapes. The skin-friendly **TAPE LOOPS** are attached to fabric to correct Hallux valgus and Hammer toe.

COMPRESSANA TAPE SOX and LOOPS combine the benefits of conservative therapy options such as physiotherapy with kinesiotaping to counteract malpositioning of the foot or toes. They are free from side-effects. They can be used long term for problems that have functional causes. These include: bunions, flat feet, splay feet and hammer toes.

The TAPE CORRECTION LOOPS for thumbs can be used for stabilisation and correction in cases of overuse and functional disorders of the thumb joint.

While basically maintaining mobility, the loops limit the rotation of the thumb. They are suitable for everyday use and can also be used in gloves or in damp or wet environments.

COMPRESSANA TAPE LOOPS

Material:

50% Polyurethan, 37% Polyamide,
13% Elastane

Types:

- TAPE LOOPS Hallux valgus, Hammer toe
- TAPE LOOP Thumb/thumb saddle joint with roll loop and adjustable band for left and right (ocean and diamond)

4. flat toe seam placed on the outside
5. antimicrobial, anti-fungal and odour-inhibiting fibre
6. antistatic

Material: 64% Coolmax (PES), 21% Cotton, 8% X-Static / Silver, 4% Elastane, 3% Polyamide

Sizes: 36 – 48

COMPRESSANA SKIN CARE

The products were developed in close cooperation with renowned manufacturers in the field of dermatological cosmetics.

COMPRESSANA SKIN PROTECT

Intensive care and repair creme

Skin regeneration and acute care of stressed, sensitive areas of the skin, even in cases of venous disorders. The antimicrobial effect of silver reduces the risk of infection. Also suitable for neurodermatitis and diabetics.

Volume: 75 ml

Ingredients: Aqua, caprylic/capric Triglyceride, Panthenol, Glycerin, Pentylene Glycol, Polyglyceryl-3 Methylglucose Distearate, Zinc Oxide, Glyceryl Stearate, Stearyl Alcohol, Tocopherol, Silver, Citric Acid

COMPRESSANA TONIC

- vitalizes & strengthens the veins
- refreshes & cools the legs
- nourishes & moisturizes
- medicinal plant extracts from horse chestnuts, camphor, menthol, comfrey and witch hazel

In combination with support and compression stockings, blood circulation and microcirculation can be improved. Can also be sprayed directly onto the stockings.

Volume: 75 ml, 200 ml

Ingredients: Aqua, Alcohol Denat., Glycerin, PEG-40 Hydrogenated Castor Oil, Sodium Lactate, Menthol, Allantoin, Camphor, Alcohol, Aesculus Hippocastanum Extract, Litsea Cubeba Fruit Oil, Lactic Acid, Hamamelis, Virginiana Leaf Extract, Potassium Sorbate, Sodium Benzoate, Backhousia Citriodora Leaf Extract, Citral, Citronellol, Geraniol, Limonene, Linalool

COMPRESSANA VEIN BALM

The vein balm protects and nourishes the skin and gives a pleasant and fresh feeling before and after wearing support stockings. Absorbs quickly and without residue.

Volume: 50 ml, 150 ml

Ingredients: Aqua, Alcohol Denat., Paraffinum Liquidum, Butylene Glycol, Caprylic/Capric Triglyceride, Glycerin, Urea, Sodium Polyacryloyldimethyl Taurate, Hydrogenated Polydecene, Trideceth-10, Eucalyptus Globulus Leaf Oil, Limonene, Camphor, Alcohol, Arnica Montana Flower Extract, Aesculus Hippocastanum Extract.

COMPRESSANA VLIES

Practical care tissues for skin and band

The fluid contained in the care tissue protects sensitive skin from irritation, soothes itching, moisturises and removes flaky skin. It also ensures a better hold and fit of support stockings and prevents slipping.

Ingredients: Aqua, Caprylic/Capric Triglyceride, Pentylene Glycol, Laureth-9, PEG-40 Hydrogenated Castor Oil

COMPRESSANA DERMA LOTION

Highly intensive emollient and skin protection for varicose veins and skin diseases

The lotion provides intensive and long lasting moisturisation. For regular use after wearing support and functional stockings.

Volume: 200 ml, 500 ml

Ingredients: Aqua, Isopropyl Palmitate, Caprylic/Capric Triglyceride, Butylene Glycol, Urea, Disostearyl Polyglyceryl-3 Dimer Dilinoleate, Dimethicone and Dimethiconol, Magnesium Sulfate, Hydrogenated Castor Oil, Cera Alba, Phenylpropanol, Tocopherol, Bisabolol, Backhousia Citriodora Leaf Extract, Citral

COMPRESSANA HYDRO LOTION

For improved tolerance and better grip of stockings

Also suitable for application in the area of the grip top and silicone adhesive edge, before and after wearing support stockings. Calms and soothes sensitive skin from mechanical irritations and rubbing.

Volume: 50 ml, 200 ml

Ingredients: Aqua, Caprylic/Capric Triglyceride, Glycerin, Pentylene Glycol, Polyglyceryl-3 Methylglucose Distearate, Laureth-9, Stearyl Alcohol, Glyceryl Stearate, Zinc Oxide, Tocopherol, Citric Acid, Xanthan Gum

COMPRESSANA INTRA

Base layer and fixing system for modular wound and skin treatment

Thanks to its soft knitted fabric, INTRA is very comfortable to wear and is suitable as an understocking under support stockings. The stockings have little or no compression and are therefore particularly easy and gentle to put on and take off. INTRA offers permanent skin protection and also has an antibacterial effect thanks to the knitted-in silver fibre. It is ideal for securing special pads and for protecting wound dressings when donning and doffing.

Material: Socks: 37% Polyamide, 29% Polyester, 22% Cotton, 8% Elastane, 4% Silver
FineLiner: 100% Polyamide

Sizes: onesize

Types:

- Toe sock, open or closed toe
with forefoot support to relieve symptoms of hallux valgus
- Base layer sock, Skin Protect® Silver X-Static
- FineLiner AG, base layer stockings

FineLiner

COMPRESSANA INSHOE SOCKS

Fashionable short shaft socks. Slipped over support stockings/tights, the inshoe-socks provide for warm feet during the cold season and protect the meshes against damage caused by footwear or little stones.

Material: Wool: 80% Wool, 20% Polyamide
Cotton: 98% Cotton, 2% Elastane

Sizes: 35 – 45
